

## **Covid-19 : Weekly Situation Bulletin**

February 7<sup>th</sup>, 2022

On a national scale, the peak of the Omicron wave has passed in France, UK, Spain, Italy and Belgium. Only Germany and the Netherlands are still in the ascending phase.

The epidemic pressure is still present in our network with 4.25% of residents and nearly 4.87% of all employees being positive.

As a reminder, the vaccination coverage rate in our network is very high, thanks to the vaccination requirements in force in most countries, with more than 90% of residents up to date with their booster. For employees, the coverage rate remains close to or equal to 100% in France, Italy and Spain. A correction of the figures in Germany, with 88% of employees vaccinated, should be noted, due to an update of the database by the German teams in anticipation of the mandatory vaccination for healthcare professionals in mid-March.

Thus, the situation remains under control with almost 99% of positive residents not or very slightly symptomatic.
