

Covid-19: Weekly Situation Bulletin

March 7th, 2022

The end of the Omicron wave is confirmed in all the countries where the group is established.

This decrease in epidemic pressure is reflected in our network with a significant drop in the number of positive people. To date, we have 2.7% of all employees who are positive compared to 3.2% the previous week and 3.5% of residents compared to 3.9% last week.

As a reminder, the vaccination coverage rate in our network is very high, thanks to the vaccination requirements in force in most countries, with nearly 95% of residents up to date with their booster. As far as employees are concerned, the coverage rate is close to 95% with 100% in France, Italy and Spain.

The situation is under control with more than 99% of positive residents not or only slightly symptomatic. The crisis will be over before the summer if no other new variant disrupts the health situation.

Doctor Didier Armaingaud,
Director, Ethics & Service Quality of the
Korian Group

Korian is the leading European care group for the elderly and frail. It is present in France, Germany, Italy, Belgium, Spain, Great Britain and the Netherlands.
