

Covid-19: Weekly Situation Bulletin

08 November 2021

Epidemic situation in the network

Despite a rebound in the epidemic situation in some countries where the Group is present (mainly in Germany and Belgium), the health situation in our network remains under control, in line with the high rates of vaccinations. As of 5 November, 22 establishments had 4 or more cases (including 12 in Germany, 4 in Belgium and 1 in France), i.e. 290 residents positive for Covid-19 across the entire European network (health and medico-social sector).

The vast majority of positive patients are asymptomatic or pauci symptomatic.

Very high level of vaccination coverage of Korian employees

The vaccination coverage rate of our employees is very high, especially in countries where vaccination of healthcare staff is mandatory. It is close to or equal to 100% in France Italy and Spain, while it reaches 80% in Germany (where vaccination is not mandatory).

In addition, the testing policy has been strengthened, particularly in countries experiencing an epidemic recovery. In Germany, for example, unvaccinated employees are tested every day and employees vaccinated every three days.

A well-underway recall campaign

The Covid-19 recall campaign is almost complete in Spain and continues in the other countries. To date, more than 53% of our residents across the network have received their third dose. As a reminder, this campaign is aimed at people over 65 or 80 years of age depending on the country and, recently, the staff. Thus, 86% of residents received their third dose in Spain, 55% in France and 26% in Germany.

Finally, it should be noted that the campaign for influenza vaccination is well underway. Thus, Spain has already vaccinated 93% of residents and 74% of employees

In 11 of these establishments. 12.3% of residents are vaccinated in Germany, the campaign has started in France, Italy and Belgium.

Maintenance of social life in institutions

In the Korian network, outings and free visits are the rule. The Group has always been very attentive to maintaining the various social activities and visits in all its establishments, for the quality of life and comfort of residents and patients.

Doctor Didier Armaingaud,
Medical, Ethics & Quality of Service
Director of the Korian Group

Korian is the leading European Care Group serving the elderly and frail. It is present in France, Germany, Italy, Belgium, Spain, Great Britain and the Netherlands.
