

Covid-19 : Weekly Situation Bulletin

12th of July 2021

Epidemic situation in Europe

The health situation in the countries where the group operates is stable despite a significant rebound in incidence. This is mainly due to the spread of the Delta variant, particularly in England and more moderately in Spain, the Netherlands and Belgium.

This pandemic resurgence is a threat to unprotected people, given that the latest studies confirm the effectiveness of vaccination and in particular that of the Pfizer/BioNTech vaccine against the Delta variant.

Epidemic situation in the Korian network

The health situation in our network is very positive in relation to the high vaccination rates.

Thus, to date, no establishment has 4 or more cases, with only 8 Covid-19 positive residents in the entire European network, and 0.15% of the staff (health and medico-social sector).

Vaccination campaign in the Korian network

Our vaccination rates are excellent, with 99% of residents and 80% of employees having received at least one dose of vaccine, and 98% of residents and 78% of employees fully protected. The team vaccination campaign in France is actively underway to reach 80%. Finally, 3rd injection campaigns have been initiated for targeted immunocompromised residents at risk.

The Group is in favour of making vaccination against Covid-19 compulsory for healthcare workers on a European scale, as it is already the case in Italy, the United Kingdom and certain Spanish regions, which would allow traceability and harmonised monitoring over time.

Testing Policy

There are still around 80,000 weekly tests of residents/patients or staff. In Germany, the frequency of testing for employees is reduced to one test per week for institutions located in an area with an incidence of 50/100,000 or less and with an employee vaccination rate of over 70%.

Hygiene standart and preventive measures

Despite the significant improvement in the situation, the new changes call for continued vigilance and full compliance with barrier measures.

Access to facilities, activities and visits

In view of the confirmation of the effectiveness of the vaccine protection, outings and free visits are the rule. Except for a particular and temporary local situation, visits are now made without making an appointment for vaccinated persons.

Even if vigilance remains necessary with the threat of new variants, the Korian network has always been very careful to maintain the various social activities and visits in all its establishments, for the quality of life and comfort of residents and patients.

Doctor Didier Armaingaud,
Medical, Ethics & Quality of Service
Director of the Korian Group

Korian is Europe's leading Care Group serving the elderly and frail. It is present in France, Germany, Italy, Belgium, Spain, UK and the Netherlands.
