

Covid-19: Weekly Situation Bulletin

March 14th, 2022

On a national scale, there has been a slight rebound in infections over the last few days in all the countries where the group is established, particularly in Germany and the Netherlands.

Almost 100% of these infections are linked to the Omicron variant.

However, this trend is not confirmed in our network, with the number of positive people continuing to fall down. To date, we have 1.9% of all employees positive compared to 2.7% the previous week and 3.4% of residents compared to 3.5% last week.

As a reminder, the vaccination coverage rate in our network is very high, thanks to the vaccination requirements in force in most countries, with nearly 95% of residents up to date with their booster. As far as employees are concerned, the coverage rate is close to 95% with 100% in France, Italy and Spain.

The situation is under control with very few symptomatic forms.

Doctor Didier Armaingaud,
Director, Ethics & Service Quality of the
Korian Group

Korian is the leading European care group for the elderly and frail. It is present in France, Germany, Italy, Belgium, Spain, Great Britain and the Netherlands.
