

## **Covid-19 : Weekly Situation Bulletin**

18th of October 2021

### **Epidemic situation in the Korian network**

The sanitary situation in our network remains totally under control in connection with the high vaccination rates. To date, only 4 institutions (1 in France, 2 in Germany and 1 in Belgium) have 4 or more cases, i.e. 53 Covid-19 positive residents in the entire European network (health and medico-social sector).

The vast majority of positive patients are asymptomatic or only mildly symptomatic.

### **Acceleration of the vaccination of Korian employees**

Our vaccination rates are excellent, with over 88% of residents vaccinated.

The vaccination rates of our employees are also very high. In France in particular, where vaccination of nursing staff has been mandatory since 15 September, the rate of fully vaccinated employees has now reached 98%.

### **A campaign for 3rd injection spreading in Europe**

The campaign for the 3rd injection is progressing in France, Germany and Spain. Thus, 73% of the residents have received their third dose in Spain, 53% in France and 24% in Germany.

As a reminder, this campaign is aimed at people over 65 or 80 years of age, depending on the country, and not at staff).

Finally, it should be noted that the flu vaccination campaign is about to begin in France and will be launched before the end of the month in most countries where the Group is present.

**Doctor Didier Armaingaud,**  
Medical, Ethics & Quality of Service  
Director of the Korian Group

Korian is Europe's leading Care Group serving the elderly and frail. It is present in France, Germany, Italy, Belgium, Spain, UK and the Netherlands.
