

## **Covid-19 : Weekly Situation Bulletin**

13th of September 2021

### **Vaccination of Korian employees**

In France, the last few weeks have been marked by the implementation of the health pass and the obligation for health workers to be vaccinated before 15 September. These decisions have helped us to increase the level of vaccination, which was already very high at the end of July. The mark of 20,000 employees fully vaccinated with the two doses was thus exceeded. 94% of residents and 89% of employees were vaccinated with the two doses.

### **Epidemic situation in the Korian network**

The health situation in our network remains stable in line with the high vaccination rates. To date, only 14 institutions (5 in France, 8 in Germany and 1 in Belgium) have had 4 or more cases, with 150 Covid-19 positive residents in the entire European network (health and medico-social sector).

The vast majority of positive patients are asymptomatic or minimally symptomatic.

### **3rd injection campaign**

All countries are preparing to provide the 3rd dose during September. In France and Germany, the campaign is now launched. In France 24% of our residents have already received the 3<sup>rd</sup> injection.

The campaign is aimed at the elderly and not at staff.

Any remaining doses will be offered in priority to residents of day care centres, residents of service residences and family members aged over 80.

### **Hygiene standard and preventive measures**

The situation has improved considerably thanks to vaccination, but the new mutations still call for vigilance and compliance with barrier measures.

### **Maintaining social life in facilities**

In the Korian network, outings and visits are the rule. The Group has always been very careful to maintain the various social activities and visits in all its establishments, for the quality of life and comfort of residents and patients.

**Doctor Didier Armaingaud,**  
Medical, Ethics & Quality of Service  
Director of the Korian Group

Korian is Europe's leading Care Group serving the elderly and frail. It is present in France, Germany, Italy, Belgium, Spain, UK and the Netherlands.
