

Covid-19 : Weekly Situation Bulletin

25th of October 2021

Epidemic situation in the Korian network

The sanitary situation in our network remains under control in connection with the high vaccination rates, and this despite a slight increase in the epidemic incidence over the last few days in some countries where the group is present. To date, 11 institutions have 4 or more cases, i.e. 158 Covid-19 positive residents in the entire European network (health and medico-social sector).

The vast majority of positive patients are asymptomatic or only mildly symptomatic.

Acceleration of the vaccination of Korian employees

The vaccination coverage rate of our employees is very high, especially in countries where vaccination of healthcare workers is mandatory. It is close to or equal to 100% in France, Italy and Spain, while it reaches 80% in Germany (where vaccination is not mandatory).

A campaign for 3rd injection spreading in Europe

The campaign for the 3rd injection is underway in France, Germany and Spain. It is starting in Belgium and Italy. As a reminder, this campaign is aimed at people over 65 or 80 years of age, depending on the country, and more recently at staff.

Thus, 86% of residents have received their third dose in Spain, 55% in France and 26% in Germany.

Finally, it should be noted that the flu vaccination campaign has begun in France and will be launched before the end of the month in most countries where the Group is present.

Doctor Didier Armaingaud,
Medical, Ethics & Quality of Service
Director of the Korian Group

Korian is Europe's leading Care Group serving the elderly and frail. It is present in France, Germany, Italy, Belgium, Spain, UK and the Netherlands.
