

Covid-19 : Weekly Situation Bulletin

29 November 2021

Epidemic situation in the network

The 5th wave continues to grow in all countries where the group operates.

Despite the epidemic pressure, the situation in our establishments remains well under control, thanks to the protection offered by the very high rate of vaccination coverage, the wearing of protective equipment and the maintenance of a regular testing policy. Across the European network, 40 facilities have more than 4 positive cases, representing 502 residents. 29 of these facilities are located in Germany.

The vast majority of those affected are asymptomatic or pauci-symptomatic, demonstrating the effectiveness of the vaccine coverage.

Vaccination coverage of our employees continues to improve in countries where vaccination of healthcare workers has not yet been made mandatory. The lowest coverage rate among the countries of operation, in Germany, is 84%

In this country, our establishments also apply a very rigorous testing policy by testing non-vaccinated employees and visitors on a daily basis.

Update of immunisation coverage (« Booster »)

The Booster campaign is actively ongoing in the group's networks. To date, more than 62% of our residents have already been able to receive a booster injection, depending on the date of their last injection. This figure reaches 90% in Spain, 64% in France and 48% in Germany.

Social life in the institutions

Regardless of the epidemic pressure, the Group's establishments take care to maintain a completely normal social life and activities on a daily basis for the quality of life and comfort of residents and patients. In particular, visits and free outings remain the rule.

Doctor Didier Armaingaud,
Medical Director, Ethics & Service
Quality of the Korian Group

Korian is the leading European care group for the elderly and frail. It is present in France, Germany, Italy, Belgium, Spain, Great Britain and the Netherlands.
